-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 38 and 62. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Color photographs (figs. 3-4) and color drawings are acceptable only for examination purposes unless a petition filed under 37 CFR 1.84(a)(2) is granted permitting their use as acceptable drawings. In the event that applicant wishes to use the drawings currently on file as acceptable drawings, a petition must be filed for acceptance of the color photographs or color drawings as acceptable drawings. Any such petition must be accompanied by the appropriate fee set forth in 37 CFR 1.17(h), three sets of color drawings or color photographs, as appropriate, and, unless already present, an amendment to include the following language as the first paragraph of the brief description of the drawings section of the specification:

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

Color photographs will be accepted if the conditions for accepting color drawings have been satisfied.

Specification

3. The disclosure is objected to because of the following informalities:
- a. "30" has been identified as and "element end" and a "locking bar".

Consistency naming reference numerals is required.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- b. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Murray in view of Rouillard. Murray discloses a bench having a forward portion (17), rearward portion (25) and crank (27). Murray is silent as to the bench being waist high and padded, thus Rouillard teaches a waist high padded bench (col. 2, line 31). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Murray in view of the teaching of Rouillard such that a bench is capable of having padding to support a user comfortably at a waist high position to enable flexibility to mount.

Art Unit: 3764

c. Claims 2-3 rejected under 35 U.S.C. 103(a) as being unpatentable over Murray and Rouillard as applied to claim 1 above, and further in view of Elder. Murray discloses a horizontal element having an upper, lower surface, front and rear end and two opposite sides. Murray does not disclose four support legs. Thus, Elder teaches four legs (24). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Murray in view of the teaching of Elder such that four vertical legs are capable of supporting a bench. As to claim 3, Elder further teaches two leg holders (58) and a support bar (34) having a row of apertures (89). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Murray in view of the teaching of Elder such that leg holders are capable of supporting a user's leg while exercising.

Allowable Subject Matter

5. Claims 4-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to L Amerson whose telephone number is (703) 306-5576. The examiner can normally be reached on Mon.-Fri from 8-5 p.m. Interviews Tue. And Thur..
